Experience

TechUnity Software Systems India Pvt Ltd (September 2022-
February 2024)

Web Researcher :

- Intelligently research the web and social media channels to identify companies, contacts and capture key information
- Check the accuracy of the data on the websites by comparing various online sources
- Data gathering, consolidating, managing, interpreting and curating them to database as per client's requirement
- Work alongside the Team Leads/Managers to establish clients' need and deliver results
- Define new data collection sources and analyze them to use it effectively

Zinnov ,Coimbatore (Jan 2021 - April 2021)

Data Analyst - Intern

- As a Data Analyst, I continuously learn about the latest research techniques and tools, as well as web technologies and trends, to ensure that research is conducted using best practices and delivers high-quality results
- I am also responsible for identifying and resolving issues and challenges that may arise during the research process, such as data quality issues, access to relevant sources, or other limitations.
- Developed and implemented a new research methodology that improved the accuracy of research findings by 100%.

Projects:

Fire accident detection system

- Fire accident detection system for physically challenged people.
- The majority of smoke detectors work either by optical detection or by ionization, and in some cases both detection methods are used to increase sensitivity to smoke.

Online Real Estate System

- Real Estate System Real estate system which is a web app enable the user to see the near by available flats.
